FOR IMMEDIATE RELEASE

Commerce Science Corporation Introduces Office Commerce®

Innovative e-commerce pioneer creates one-stop shop for commercial property management

ATLANTA, GA (February, 2 2013) – Commerce Science Corporation, a unique Software as a Solution (SaaS) provider of e-commerce technology, is pleased to announce the formation of a new subsidiary company, Office Commerce LLC, that will bring a cache of new software products to the commercial property management marketplace.

Robert E. Helmer, CEO of Commerce Science Corporation, announced on February 2, 2013, that it has begun working with major property management companies in the Southeast to provide Office Commerce® as a tool to those management companies for offering new services to their tenants. “Our goal is to make the lives of tenants easier by providing products and services not currently available to them in their traditional workplace,” Helmer explained.

Added-value for Commercial Tenants

“Our job is to create additional discretionary income for property managers that could be used in a number of ways to reinforce tenant relationships,” stated Doug Jacke, Managing Director of Office Commerce. “Property managers strive to maintain tenant satisfaction by creating positive lines of communication, idea sharing and problem solving with tenants that would increase the tenant's overall satisfaction and reduce their turn-over. Our primary job is to provide unique value-added services for tenants through their management firms,” Jacke went on to say.

A Revolutionary eCommerce Solution

Office Commerce creates a unique co-branded online eStore for the respective property manager to offer products and services to their tenants at discount prices. The eStore requires no extra work from the property management staff while providing a percentage of every dollar spent on the eStore.

Nation-wide Roll-out Anticipated

Commenting on the expansion of the business, Helmer stated, “After launching in the Georgia and Florida markets, we anticipate offering Office Commerce territories throughout the US market. Our unique solution allows an unlimited number of property specific stores, products and vendors to be launched and managed very efficiently from a centrally-controlled administrative portal.”
