## FOR IMMEDIATE RELEASE

---

### **Commerce Science Corporation Announces Release of New Version**

*Leading e-commerce provider announces new version release.*

**Atlanta GA (February 29, 2012)** - Commerce Science Corporation, a leading provider of e-commerce solutions, is pleased to announce the release of eStoreXpress, version 3.0. "This new release is a major upgrade of the front-end design and the back-end functions. The front-end changes include a new templating system tied to a library of widgets, allowing every eStore owner to control the look and feel of their eStore front. The back-end improvements include the migration of all functions into a single framework with hundreds of new features. Vendors, eStore owners and platform management have new tools to operate the system without the need for IT support. Platform managers have a greater number of template options from which to choose, with the added ability of granting permission to eStore owners to access and utilize the various functions. This version's many new automated features provide platform operators with a more user-friendly and flexible environment that can be fully managed with limited personnel," stated Todd Sieland-Peterson, VP of Technology.

**Commerce Science Corporation** is a leader in the production of Software as a Service (SaaS), specializing in multi-channel e-commerce solutions. Serving national markets for associations, distributors and franchises, Commerce Science Corporation strives to provide the highest quality e-commerce solutions.

Recognitions and accolades include honors from the Georgia Technology Summit, Innovation 2.0 Managing Innovation for Growth. Commerce Science Corporation was named in the top ten of the Most Innovative Companies of 2007, as presented by the Technology Association of Georgia (TAG).
